

Task code:	brackets	mobile	peaks
Task title:	<b>Brackets</b>	<b>Mobile</b>	<b>Peaks</b>
Task type:	Batch	Batch	Batch
Name of the input file:	<b>brackets.in</b>	<b>mobile.in</b>	<b>peaks.in</b>
Name of the output file(s):	<b>brackets.out</b>	<b>mobile.out</b>	<b>peaks.out</b>
Time limit for one test run (time is measured on the grading server):	1 second	0.6 seconds	0.5 seconds
Memory limit:	64MB	64MB	64MB
Maximum possible score:	100	100	100

Input and output file names must be specified assuming they are in the current folder (without specifying full path) exactly as mentioned in task description (**in lower case**).

The same test or test group may correspond to several subtasks mentioned in „Grading” section.

When compiling on the grading server, the following compilers and switches will be used:

- Pascal  
`fpc -O2 -Sg -XS`
- C  
`gcc -std=gnu99 -O2 -s -static -lm -xc`
- C++  
`g++ -O2 -s -static -xc++`
